Diminutive Patient
AT BACKUS HOSPITAL.

A Pigeon Walked in the Front Door
The Other Day to Get His Wing
Fixed Up.

There is a new ward at the Backus
hospital, an entirely private one, and
in it is one of the most interesting
cases the staff has had under observa-
tion this winter. Late Friday after-
noon, about half past five, a ball in
the day's storm, the attendant at the
main entrance looked down the front
steps, and up them, in a manner that
was quite determined and decisive, came
hopping—a white pigeon. Straight up
the steps and to the door walked the
bird, and then when the maid opened
the door, quite calmly it hopped into
the vestibule. The attendant called for
a nurse and, when she came, she found
this white bird sitting on a table near
a prospective patient. She picked up
the bird, found blood on its wing and
a wound that looked as if some boy's
arm might have hit it, and only one
pigeon seemed to be suffering and the
formalities of admission were dis-
pensated with. The bird was taken right
away to the third floor, where it was
cleansed and dressed and now Mr.
Pigeon is making a splendid recovery
in a box that is all his own—the new-
est ward at the hospital.

And just as soon as his wounded
wing is sound once more, the pigeon
will again be given his liberty, if he
decides he wants to go.

TWO BOYS INJURED BY EXPLOSION

George Sadinski of Aqueduct Street. May Lose One Eye by

Injury When Percussion Caps Went Off Sunday Morn-

ing—West Side Residents Awakened by the Explosion

at 7:30 O'Clock—Jacob Sadinski Also Hurt.

West Side people who live anywhere
in the neighborhood of 14 Aqueduct
street were roused out of their slum-
bers Sunday morning—except perhaps
the rare few who are up at 7:30 on the
day of rest—by an explosion of some
kind at once. The noise was
quite contrary to the customary
quiet of the neighborhood and it
startled people as far away as the
street. Chief Stanton, whose home on
Fairmount street is close by the place
where the trouble broke out, was up,
being a habitual early riser, acented a
fire or somebody shot, and so he pulled
on his rubber boots and betook himself
quickly to the seat of disturbance. So
did about a hundred more people in
the next few minutes. The chief got
there just in time to see David Sadin-
ski carrying off his unconscious son in
his arms to the office of Dr. Harry E.
Higgins.

The noise brought Policeman Brock
and the result of investigation was
that it was learned that George Atle-
man of Providence, R. I., who peddles
dishes from a wagon, had been the

cause of the trouble, although it was
not altogether his fault. He had spent
the night at the Sadinski home on
Aqueduct street and one of the women
who lived next door got interested in
his wares. She had no money and so
she offered to trade some copper wire
for dishes. To get the insulation off,
Atleman built a little fire in the mid-
dle of the street and put the wire in it.
The two Sadinski boys were right on
hand to see the fun. Then the thing
blew up. It was found later when the
wire was examined that it was evi-
dently used for blasting and that it
was connected with a number of per-
cussion caps such as are used to ex-
plode dynamite, which must have
burst in the flames.
